#### Onion.

We pay particular attention to the quality of our stocks of Onions. The sale which our "Hero" enjoys amongst our customers is a recognition of our efforts in this way.

#### Flat Keeping Varieties.

Per lb. -s. d. KELWAY'S HERO. We recommend this as the finest form of a reliable heavy cropping and long-keeping Onion. The bulbs are exceedingly handsome when matured, and are continually taking prizes where exhibited. The colour of the skin is a rich tawny yellow or very light brown; the bulbs attain a very great size, and on account of the density in texture of the flesh are of enormous weight; they are of great depth without being swollen at the neck, and thus in shape are between the "globe" and "flat" varieties. # Agricultural Seeds.

All our Stock seeds are saved from specially-chosen transplanted Roots.

For very many years have we been Growers and Selectors upon our own lands near Langport of Special Stocks of Swedes, Mangolds and Turnips, and we honestly believe and state with the utmost confidence that purer or choicer kinds than our Special Sorts have never yet been sold. This refers in proportionate degree to our strains of other varieties. ALL are to be relied upon as the best of their kind, and undergo rigid selection.

Prices and Special Quotations for Agricultural Seeds sent on application.

#### Mangold.

KELWAY'S PRIZETAKER YELLOW GLOBE. The entire stock was originally selected from one bulb; it has a very small top and very few fibrous roots; it is therefore lifted with a minimum of labour and is fed with a minimum of waste; its symmetrical shape and attractive colour make it unequalled for exhibition; the flesh is of the densest consistency and most nutritive quality, and it reaches a very great size; consequently it is an exceedingly heavy cropper, being absolutely unsurpassed in this latter respect. Having been fixed as a variety for such a number of years, its sportive character is nil. We are

LWAY'S IMPROVED CORNER'S YELLOW GLOBE. This needs no introduction in the West of England. The stock originated in our neighbourhood, and seed was obtained by us from Mr. Corner himself upon its introduction. KELWAY'S EXHIBITION GOLDEN TAN-KARD. We have never had greater satisfaction in introducing any sort than we have in recommending this superb variety. It was found amongst our "Model" Golden Tankard, to which it is superior in the dark colour of the skin and the rich golden hue of the flesh. The perfect "Tankard" shape of the original "Model" is retained, together with its highly saccharine quality and extreme solidity of flesh. An enormous weight per acre is obtained from it.

## Swede Turnips. Purple-topped Varieties.

#### KELWAY'S LANGPORT MAMMOTH.

The Hardy Swede.

This variety is an enormous cropper, and one of the most hardy and disease resisting sorts in cultivation, seldom getting mildewed. We have also noticed that it possesses the useful property of growing freely in all kinds of soils. It is as near as possible globe shaped, with a very short neck fully developed, dwarf foliage, and a clean single tap root. It possesses very dense sound flesh. The portion of the root growing out of the ground is of a deep plum colour. We annually save large quantities of this variety entirely from our own stock seed on account of the increasing favour which it meets with. Our stock is still as pure as ever, indeed we think we may say it is improving.

A fine representation of this variety, 2 feet by 3 feet painted in oils from nature, mounted on canvas, and framed, will be sent to all who stock it.—See

annexed illustration.

#### KELWAY'S LANGPORT MONARCH.

The Heavy-cropping Swede N.B.—This should not be confused with a *Monarch* Swede which was introduced to the trade some time after this variety was sent out. The Langport Monarch, is rather higher in the shoulder than the Langport Mammoth, and consequently each individual root is somewhat larger. The upper portion of the bulb is of a bright carmine colour. The flesh is very firm, the top short, and the absence of fibrous or forked roots remarkable. The crop per acre is unsurpassed in weight and quality.
